Alberta's International Merchandise Exports
January - June 2006
Highlights

Overview: In the first half of 2006, the value of Alberta's international merchandise exports grew by 14.9% from the same period last year, to $40.5 billion. About one-third of shipment gains was related to higher volumes. Sharply higher crude oil exports, due to volume and price gains, accounted for 85% of Alberta's total export increase. Excluding crude oil, merchandise exports rose by 3.2%. Livestock exports increased seven-fold due to the relaxation of the U.S. import restrictions on live cattle. In the second quarter of 2006, merchandise exports were up 10.3% from the same quarter last year.

Major Commodities: During the first six months, price and volume gains spurred sales of crude oil (+42.9%), ethylene polymers (+33.1%), propane (+37.9%) and diesel fuel (+107.3%). Higher prices pushed shipments of natural gas (+0.4%) and polyethylene (+25.6%) higher. Increased volumes spurred shipments of non-durum wheat (+19.5%), oriented strand board (+10.1%) and canola (+51.2%). Live cattle, not exported in the first half of 2005, reached $349 million. Lower exports of beef products (-44.6%), lumber (-16.9%), ethylene glycol (-32.7%) and nickel (-22.9%) were the result of lower volumes and prices. Chemical wood pulp deliveries fell by 1.5% because of lower prices.

Exports by Industry: Mining and energy sector exports climbed by 19.7%, primarily due to a surge in crude oil shipments. Crude oil sales bounced back from last year's oil sands production problems. Primary agricultural shipments jumped by 64.9% due to a steep rise in *livestock* shipments (+589.2%), and *crop* exports (+27.1%) because of higher grain and oilseed sales. Manufacturing exports fell by 1.1% because of lower prices, despite higher volumes (+3.0%), especially for *petroleum & coal products*. Deliveries of *food, feed and beverage products* declined by 26.0% because of lower beef shipments.

North America: Exports to the U.S. accounted for 89.9% of exports. In the first half, U.S. exports were up by 17.2%. Sales of crude oil, live cattle and ethylene polymers increased strongly. Mexican imports of Alberta goods rose by 12.9% because of higher canola and polyethylene deliveries.

Asia: Exports to Asia fell by 11.2% due to lower ethylene glycol, canola and wheat deliveries. Exports to China, Alberta's second largest trading partner, fell by 25.4% because of lower shipments of ethylene glycol and sulphur. Japanese deliveries declined by 5.1% due to lower canola and pork deliveries. Large shipment gains were registered for Sri Lanka, Pakistan and Singapore.

Europe: European imports of Alberta goods decreased by 3.5% with sales of nickel, cobalt and wood pulp retreating. Germany's imports rose sharply due to a large increase in canola oil deliveries. Lower sales were noted for Belgium and Italy because of lower nickel sales. Increased deliveries were noted for the Netherlands and United Kingdom.

Middle East and North Africa: Exports to the Middle East and North Africa surged by 38.9%. Large export increases to the region were registered for drilling equipment, wheat, canola and barley. Sharply higher shipments were noted for Iran, Saudi Arabia and the United Arab Emirates.

Other Regions: South American imports of Alberta goods increased by 21.0% due to improved wheat, ethylene polymer, specialized machinery, and tap and valve deliveries. Increased sales of diesel and other fuel oils to Guatemala pushed Central American imports up sharply by 40.3%. Commonwealth of Independent States' imports climbed by 29.9%. Russian imports nearly doubled as tanker trailer and pork sales rose sharply. The Oceania region's imports fell by 10.6%, as shipments to Australia and New Zealand dropped. Sub-Saharan Africa's imports retreated by 2.6% because of reduced shipments of gears and pumps for liquids.

ALBERTA'S INTERNATIONAL MERCHANDISE EXPORTS

* Exports to individual states can be seriously over- or under-stated, because energy exports, such as crude oil and natural gas, cannot be allocated to the state of final destination. For example, most of the natural gas exports assigned to Washington are destined for California.
